LEARNSPECTRUM SERVICES

Learning solutions made simple.

WHAT WE DO

LearnSpectrum makes it easy to develop the skills and capabilities within your workforce...fast.

With LearnSpectrum, you stand up an immediate team of learning experts ready to assist your L&D organization. Overnight you will gain efficiencies by outsourcing the time-consuming aspects of external vendor training. We are not a training company. We are your learning & development team at the ready.

OUTSOURCED LEARNING EXPERTISE

We know the industry and look forward to sharing our knowledge with your organization. Our Client Success Consultants work with you to identify what works best – the human touch is integral to what we do. Call it L&D + Care.

TRAINING ADMINISTRATION AND ENROLLMENT SERVICES

We manage and facilitate all your requests. Enrollment, reschedules, onsite events, management approval workflow, open enrollment. Everything.

VENDOR MANAGEMENT

Does your L&D organization manage over 400 vendor relationships? We do. LearnSpectrum can be your ONE resource to thousands of courses.

REPORTING AND METRICS

Learn where your teams are taking training. When you have one L&D resource, you just need one report to capture your expenditures and other critical information. This enables you to understand spending trends, the type of training your employees prefer, and forecast future needs and financial impacts.

CUSTOMIZED LEARNING PORTAL

Need a vehicle to place training requests, capture managerial approval and processes, as well as cost center metrics? Our portal captures your critical administrative needs for each expenditure with reporting capability.

A MOUNTAIN OF VALUE

What determines value? We quantify it by the combined associated costs invested within each students request. The actual tuition savings we provide to your enterprise and the time we save your team with our knowledge.
