

## How to Create your SAIC APN Account

1. [Access the Self-Registration Site](#)
2. Click the blue “Let’s get started” button at the bottom right of the page
3. Register using your work email address (aligned to Partner organization)
4. Confirm your account with the registration code that will be sent to your email
5. You may now login via your APN Login
6. Upon logging in for the first time, you will be prompted for additional information. If you select “Yes” to the Training & Certification Consent question you can share your Certification information with your Partner organization.

## How to Link Your SAIC email to your personal APN account

If you have **previously created** an AWS Training and Certification account with a personal email address, and used that account to complete trainings or achieve certifications, please take the following steps to link that account with your SAIC APN Account:

1. Log into [APN Partner Central](#) (should be registered using your SAIC email address)
2. Navigate to the “View My Profile” page and click on Edit
3. Add your certification email address to the “AWS Training and Certification Account Email” field (if not already added). To confirm this certification email address:
  - a. Log into your [AWS Certification Account](#)
  - b. Confirm Active certifications aligned to account:
    - i. Click on “Achieved Certifications” at the top. Active certifications will be listed.
  - c. Identify email address aligned with this AWS Certification Account.
    - i. Click on “My Profile” at the top
    - ii. Certification email is listed in the “Email address” field
4. Review Certification Consent language and select Yes/No
5. Click “Save” at the top of the screen
